

Developing LNG Terminal Projects -- The Key Role of Community Outreach

*Mark D. Boudreaux
ExxonMobil Development Company*

Diverse Supply Sources Required to Meet Future Demand

EM US LNG Terminal Plans

ExxonMobil plans to:

- **Import at least 2 BCFD into the US from Qatar by 2008/2009**
- **Invest in the entire LNG value chain (supply, liquefaction, shipping, regasification and pipeline connections)**
- **Develop up to two LNG terminals in the Gulf Coast by 2008/2009**

ExxonMobil has:

- **Executed an HOA with Qatar for 2 BCFD of supply**
- **Initiated the permitting process on 3 projects in the Gulf Coast region**
 - Golden Pass LNG project near Sabine Pass, Texas
 - Vista del Sol LNG project near Corpus Christi, Texas
 - Pearl Crossing LNG project, 40 miles offshore of Louisiana

Community support, timing of permitting approval, and project economics are key to moving these projects forward into construction

Community Benefits of an LNG Project

- **A significant long-term, competitive supply of reliable, clean-burning energy for local industry and communities, as well as national markets**
- **Direct Benefits - creates new jobs and helps retain existing jobs**
 - Over 50 permanent, highly paid skilled positions plus support jobs
 - Numerous construction/support jobs (600 at peak) over the 3 -year construction phase
 - Local contractors/suppliers will have opportunity to competitively bid for work on the project
 - Millions of dollars of local and school tax revenues annually
- **Investments in the community via grants and contributions**

Corporate Citizenship Approach

- **Economic and Community Development**
 - Positive contributor to the community through the energy we provide, the jobs we create, the taxes we generate and the community investments we make.
- **We build our core values and principles (integrity, safety, health, environment and community care) into our business processes.**
- **Before investing in any major energy project, we prepare comprehensive environmental and social assessments.**
- **We meet regularly with community leaders, community associations and non-governmental organizations.**

Community Outreach During Permitting

- **Meet regularly with local and state officials, community leaders, residents, regulators, and other interested parties**
 - 400+ meetings since mid-2003, including
 - + **Near-neighbors, local fire chiefs, port officials, local pilots, environmental NGOs, school officials, business associations, community groups**
 - + **Over 15 key federal and state regulatory agencies per project**
 - + **Mayors, County Judges, State and Federal Representatives**
 - 6 public open houses and 8 FERC/USCG public meetings in the communities
- **Communicate information about the project**
 - Websites for each project
 - LNG video (also on the websites)
 - Over 20 fact sheets
 - + **Summarized key findings of over 5000 pages of environmental, safety and socioeconomic assessments filed by each project**
 - Visitor center
 - Speeches
 - Toll-free numbers for citizens to ask questions
